TECHNOLOGY OUTCOMES FOR STUDENTS

Computer and information technologies are integral features of our culture. These technologies are extremely useful in enhancing, supporting, and delivering instruction, and for students in researching, preparing and submitting assignments. These technologies are essential for students.

1. In order to support its instructional goals and to assure that its graduates are adequately prepared for the workplace, each academic program will incorporate technological competencies into its curricula and assess expected outcomes.

At minimum, the outcomes will include:

- Ability to use appropriate software for the development of papers, reports, and other assignments.
 - Ability to conduct searches on the Internet and to use library databases to access relevant literature.
 - Ability to send and receive electronic mail with attachments
2. A student's achievement of the required competencies defined in 1 above will be verified on the student's application for graduation by the advisor.
