

NSF Project Roster

The American Recovery and Reinvestment Act, commonly referred to as ARRA or the Stimulus Package, is a \$780 billion federal program designed to reverse the recession that began in 2008. ARRA finances infrastructure projects that create jobs in the near term and improve American competitiveness in the future.

Under ARRA, the National Science Foundation awarded grants under the Academic Research Infrastructure Program: Recovery and Reinvestment (ARI-R²). One highlighted purpose of ARI-R² is to “update existing research facilities at institutions of higher education, including graduate and undergraduate institutions, in order to support research that can address the challenges of the 21st century.”

National Science Foundation \$ 2.3 million

GSU Principal Investigators

Karen D’Arcy	Tim Gsell
Mary Carrington	Phyllis Klingensmith

Office of Sponsored Programs and Research

James “Chip” Coldren, Acting Director

Jennifer Moorehead, Deputy Director

Design Team

LCM Architects	Architecture
Robert G. Burkhardt Associates	M/E/P/FP Engineering
Matrix Engineering	Structural Engineering

Construction Team (NSF Component)

Loung’s Corporation	General Contractor
Stern Corporation	Ventilation
Ideal Heating and Cooling	Heating
Calumet City Plumbing and Heating	Plumbing
Excel Electric	Electrical
