

# General Education Requirements for Freshman and Sophomore Cohorts

## Our goal is to help you succeed

Your freshman year at Governors State University is no ordinary first year of college. It is designed to give you a foundation on which to build during your college career and for life after GSU. As part of a challenging academic community, you'll learn strategies and skills to become a critical thinker. You'll become confident in your abilities as a student and as a member of a diverse community.

You will be part of one of three Big Ideas that are the focus and theme of your general education program:

- **Civic Engagement**
- **Global Citizenship**
- **Sustainability**

You'll find yourself in classes with others pursuing your theme during your first and second years. Each theme incorporates values-based education, helps you explore various careers and encourages you to take a world view as you choose your major.

## Three Themes

**Civic Engagement:** The founders of our nation had some big ideas. Students in this theme group will dig deep into those ideas and learn more about what democracy means. Your courses will focus on the value of human dignity, tolerance, justice, ethical integrity and freedom. You'll develop important skills in thinking critically, deliberating and making collaborative decisions about important questions. You'll develop ability for moral discernment, civility, compromise and mutual respect for others.

**Global Citizenship:** Ours is a diverse, interconnected world. Students in this theme group will look into the forces that drive both collaboration and conflict among nations. You'll study the global influences that explain how we all work together – or not – including social, technological and environment trends.

**Sustainability:** You have a role in protecting the health and vitality of the planet. Students in this theme group will concentrate on important issues that will prepare you for that role. You'll learn what it means to be responsible in how we manage our resources. You'll also look into the environmental, economic and social implications of what it takes to be a good steward.

## Advantages

No matter in which theme group you join, there is more built into your first year to help you succeed.

- Classes are small. Only 90 students in each of the three theme course groups, with 30 students in most classes.
- All first year classes are taught by experienced faculty members.

# General Education Requirements for Freshman and Sophomore Cohorts

To help you imagine how you'll succeed at GSU, this chart shows the courses that will be included for each themed group (credit hours are in parenthesis):

## Civic Engagement Cohort Courses:
