

**Mission: Creating a community that embraces and cultivates recovery while reducing the stigma of substance use disorders and mental health.**

---

The central focus of the Lake County ROSC is to create an infrastructure, or "system of care", with the resources to effectively address the full range of substance use problems within the Lake County communities.

### **About LC ROSC**

Northern Illinois Recovery Community Organization is the lead agency driving the system of care transformation. The system encompasses multiple sector partners including substance use and mental health providers, persons with lived experience, family members, law enforcement, judicial personnel, faith base organizations, community organizers and local colleges.

### **What is ROSC**

Recovery Oriented System of Care (ROSC) is a coordinated network of person-center community-based services and support. ROSC builds on the strengths and resilience of individuals, families, and communities to achieve abstinence and improve health, wellness, and quality of life for those with or at risk of substance misuse problems.

### **ROSC Goals**

The overall goal is to develop an integrated recovery system for those seeking substance use and mental health treatment by involving the community to improve the availability of services. ROSC also seeks to destigmatize substance use and mental health disorders through this shared vision.
