

Bond County Recovery Council-Bond County

**Outreach Plan
September 2023**

Audience:

BCRC members previously identified nine different groups in the communities for focus of our Outreach Plan. These groups will remain our focus for the upcoming year.

Audience	Communication Goal
College (Greenville University)	Ensure the College is aware of our efforts and how they can support recovery among students and employees. Also, how the BCRC can continue provide resources, training and education to the University.
Substance Use Disorder and Mental Health Providers	All providers in the Bond County area are aware of our efforts with the ROSC Council and how they can be involved. Continue to encourage involvement as new providers come to the area.
Persons with Lived Experience (PLE's)/Families	PLE's and their families are becoming aware of the efforts of the Council, how they can engage, and what recovery supports are available in the community. We will also continue with our monthly Advisory Board (PLE's) meetings to guide the work of the council.
Recovery Communities/Oxford Houses	Individuals are aware of the Council, how they can engage, and recovery supports available in the area. We will continue to reach out to Recovery Communities.

Faith Community	Churches and faith groups in Bond county are becoming engaged in the work of the ROSC Council and we will continue to provide resource materials, trainings and engage the Faith Community in our work.
Businesses	Businesses are becoming aware of the efforts of the ROSC Council and how they can support individuals in recovery. We are involved with the Chamber of Commerce. We received their annual "Community Service Award" for exceptional community involvement by a non-profit in January of 2023
Law Enforcement/Probation Dept./Drug Courts	Officers/Probation Dept./Coroner are aware of the work of the ROSC Council and how they can be involved. We will continue to engage and support these groups.
Mental Health Alliances	These groups are made aware of the work of the ROSC Council and how they can be involved.
Medical Community	Physicians and other medical personnel are aware of our efforts and how they can support individuals in recovery and their families. HSHS Holy Family Hospital in Greenville (the only hospital in the county) has been great supporters of the council and participate in all that we do. We will continue to nurture that relationship.

The five most critical audiences for our area are:

1. Persons with lived experience (PLE's)/families
2. Recovery Community Service Providers
3. Faith Community
4. Medical Community
5. Law Enforcement/Probation Department/Coroner
