Appendix K. Harm Reduction

NARCAN is a medication that can block or reverse the effects of an opioid overdose. Anyone can easily use NARCAN to save the life of someone overdosing on opioids, including heroin or prescription medicines like OxyContin® or Percocet®. If you or your agency would like to receive additional training on using NARCAN, please get in touch with the Coles County ROSC at danat@hourhousecovery.org. If you or someone you know is overdosing and needs immediate attention, please call 911. In the instance you are with that individual, the Good Samaritan Law states that anyone who calls for help or drops off someone experiencing a drug overdose will not receive charges for possession of paraphernalia. One limitation of this law is that the person who overdosed is not covered, and any other crime committed at the scene is not protected by law.

Community Readiness

The professional and lived experience recovery communities have demonstrated enthusiasm and willingness to participate with the Coles County ROSC efforts, under the lead agency Hour House. The team is continuously seeking to bring new stakeholders to the table, in order to ensure that a wide array of roles and perspectives is represented. This includes those organizations and agencies listed in the Community Resources Appendix.

Community readiness is also deemed positive due to the following:

- Strong interest in ROSC Council meetings.
- Good representation from lived experience communities, particularly Narcotics Anonymous and Celebrate Recovery.
- Good support in the community from business owners. Many Business owners have a working agreement with the Hour House to be a Drug Overdose Prevention Program (DOPP) distribution site.

The following opportunities are available to support the ROSC and a Recovery Center Organization:

- Identify “wraparound” solution that inventories all the various organizations’ services and support, to better increase awareness among professionals and recoverees about multitude of resources available in the community.
- Look at community providers to see if they can expand their supports to individuals in recovery who need transportation to work, recovery groups, or childcare.
- Continue discussions among council members to further clarify requirements for implementing identified gaps in services.
- Research community providers to fill the service gaps for individuals in recovery. Possible service expansion into more rural areas within Coles County.

Priorities for Expansion

The Coles County ROSC will require continuous commitment and involvement from its stakeholders in order to overcome many of the risks and challenges associated with invoking change in a community-wide fashion. Risks to the project effort could include member complacency, key stakeholders missed or not involved, lack of funding, loss of buy-in or interest, *too many* perspectives to the point the council becomes unwieldy, groupthink about certain priorities (if Council membership not kept fresh), and other potential issues that may be identified further into this effort. With this in mind, some of the measures required to continue expanding the ROSC are as follows:

- Continual Council Membership Recruitment
- Provide training and education within the ROSC Framework

- Continue to enhance and distribute harm reduction materials in the community.
- Educational Sessions such as Disease Concept, Stigma Reduction, MAT Services, 12 Steps, Different Recovery Paths, Racial Equity, Parenting, Pathways to Spirituality, ACEs etc.
- Sustained research of Services and Supports offered to individuals covering areas of the recovery spectrum
