Appendix K. Harm Reduction

NARCAN is a medication that can block or reverse the effects of an opioid overdose. Anyone can easily use NARCAN to save the life of someone overdosing on opioids, including heroin or prescription medicines like OxyContin® or Percocet®. If you or your agency would like to receive additional training on using NARCAN, please get in touch with the Cumberland County Health Department at 217-849-3211, HRC at 217-465-4118, or Clark and Cumberland County ROSC at kristinad@hourhouserecovery.org. If you or someone you know is overdosing and needs immediate attention, please call 911. In the instance you are with that individual, the Good Samaritan Law states that anyone who calls for help or drops off someone experiencing a drug overdose will not receive charges for possession of paraphernalia. One limitation of this law is that the person who overdosed is not covered, and any other crime committed at the scene is not protected by law.

Community Readiness

The professional and lived experience recovery communities have demonstrated enthusiasm and willingness to participate with the Clark and Cumberland County ROSC efforts. The team is continuously seeking to bring new stakeholders to the table, in order to ensure that a wide array of roles and perspectives is represented. This includes those organizations and agencies listed in the Community Resources Appendix.

Community readiness is also deemed positive due to the following:

- Good community involvement at ROSC community kickoff meeting and participation at monthly ROSC council meetings
- Recognition for the need for a certified drug court and community members pursuing it
- Local drug free coalition pursuing RCO development
- Council members recognizing the need for more educational opportunities in the community and acting (e.x. Human Trafficking training)
- Community receptiveness to Naloxone

The following opportunities are available to support the ROSC and a Recovery Center:

- Continue to create resource guides for the county
- Facilitate conversations with recovery supports and services to brainstorm how to expand support for persons with lived experience.
- Continued community alliance meetings to determine ways to get people involved in recovery
- Research gaps in service within the community.
- A high priority gap is a recovery home or transitional housing facility in the community.

Priorities for Expansion

The Clark and Cumberland County ROSC will require continuous commitment and involvement from its stakeholders in order to overcome many of the risks and challenges associated with invoking change in a community-wide fashion. Risks to the project effort could include member complacency, key stakeholders missed or not involved, lack of funding, loss of buy-in or interest, *too many* perspectives to the point the council becomes unwieldy, groupthink about certain

priorities (if Council membership not kept fresh), and other potential issues that may be identified further into this effort. With this in mind, some of the measures required to continue expanding the ROSC are as follows:

- Continual Council Membership Recruitment
- Provide training and education within the ROSC Framework
- Educational Sessions such as Disease Concept, Stigma Reduction, MAT Services, 12 Steps, Different Recovery Paths, Racial Equity, Pathways to Spirituality etc.
- Sustained research of Services and Supports offered to individuals covering areas of the recovery spectrum
