Technical Service Opportunities

1. Partner outreach and engagement – A video training that can be played to ROSC to teach them a deeper level of engagement and outreach that is effective from their perspectives and in their work.
2. Defined roles – ROSC RCO RC RH – What does it all mean and how does it all fit together?
3. Sector roles in recovery – It can be challenging for sectors to see their defined role in the recovery sphere. Teaching each other about how they touch recovery and can serve the recovery community would be helpful in helping sectors recognize their true potential.
4. ROSC Orientation – One that is streamlined and provides an in-depth view of ROSC, what it does, and how it works to help ensure councils are operating (in a general lens) in unison while recognizing every community is different.

Training would best serve the councils if it was something that was prerecorded and helped ROSC coordinators cut out some of the redundant task, freeing them up to conduct more outreach, and resource linkages/education

Community Readiness

We accomplished a lot in 2023, laying the groundwork for an intricate network of services and support within our community. None of this would have been possible without the direction and guidance of our council. Our continued collaboration and coordination is the key to our success. As we move forward, building permanent solutions to address the barriers to recovery will be the key to our continued success. Our top priority must be in identifying funding streams that will enable us to put in place long-term sustainability rather than short-term fixes. The development of an RCO that builds upon our prevention/education work and expands our recovery support program will be a stepping stone of this council's work. An RCO will provide permanent solutions to addressing the transportation and will provide a permanent "safe place" for individuals to turn to support their recovery and navigate resources, helping build a bridge between clinical and non-clinical services

The following are barriers the council's work will continue to address:

1. Transportation
2. Access – Clinical support & resource navigation
3. Recovery support/Peer Support -
4. Housing
