COMMUNITY RESOURCE GUIDE

Ogle/DeKalb Counties

Recovery Oriented System of Care Council

Lead Agency: Sauk Valley Voices of Recovery

Coordinator: Heather Tomlinson

The DeKalb Mental Health Board did a deeper study to assess Mental Health/Substance Use Disorder in their survey "Collaboration for Equity and Belonging in Behavioral Healthcare Committee (2023)." They took multiple factors into consideration such as race, age, gender, ethnicity etc. According to respondents and their results, they would like to see more support or peer groups, an inpatient-outpatient treatment center and partial hospitalization programs. This is consistent with the Community Needs Assessment that we did, as far as the need for in patient treatment. We did not ask questions about peer led groups or partial hospitalization programs, however this gives us more information to utilize for our the next assessment for the needs of the community. In this survey many respondents had also expressed having negative experiences seeking help in the past and the feeling that the language barrier matters when referring to mental health issues.
